PLEASE NOTE	Only the very best raw hides are used for Pure-Aniline leathers. The natural characteristics such as insect bites, fat wrinkles, growth marks and healed scars can still be visible, a sign of a superior natural leather with its own individuality. Pure-Aniline leathers do not have any protective coating or pigment on the surface and are therefore more susceptible to fading from sunlight exposure. Care should be taken in high-traffic areas where food and drink spillages could stain the leather. Results from performance tests are guidelines only
