#### PLEASE NOTE

- Sourced from high quality raw hides, Semi-Aniline leathers have a natural grain and an invisible water-based protective coating that ensures the leather is suitable for the most demanding situations while maintaining a very soft handle. A very fine pigment is applied to its surface thus increasing the leather's resistance to colour change that is caused by exposure to sunlight.
- Results from performance tests are guidelines only.

#### CARE

- Leather Care for Finished Leathers is available from our website

#### ENVIRONMENT

- Leather is an agricultural by-product
- Tannery operates an Environmental Management System, has reduced energy and water use and uses 30% less water than the industry average. 15% of the tannery's energy is renewable, sourced from the sun and wind. All by-products are reused or recycled
- Certified as low-VOC + Oeko Tex
- Reusable

#### GREEN STAR

- EUROSOFT can contribute low VOC points
- EUROSOFT can be used on white furniture certified to Ecospecifier, AFRDI, ECNZ and GECA
- The Green Star Rating Tool states "Where at least 90% of an item's mass is certified to a GBCA recognised standard, the item can be entered as a certified product at Level A, B or C." Therefore any leather can be used as leathers are almost always under 10% by weight of a furniture item

#### LEED

- EUROSOFT can contribute low VOC points

#### WELL

- EUROSOFT can contribute to Low VOC / VOC Reduction
- Toxic Material Reduction: EUROSOFT is free of PFCs, flame retardants, phthalates and urea formaldehyde

#### SEATING COMFORT RATING

A rating to determine a leather's seating comfort based upon the leather's ability to breathe and absorb moisture. Tested to ASTM E 96 M-05. EUROSOFT achieves a Good Seating Comfort rating.
