PLEASE NOTE	Results from performance tests are guidelines only	

SHADING / NAP

- The pile on velvet may flatten during upholstery or use. This is a normal characteristic of velvet and is not a fabric fault.
- A shading appearance during use should be expected, especially in areas of high use such as arms, seat fronts and back cushions.
- When upholstering it is important to pay attention to the nap direction. Velvet must be upholstered or sewn with the nap running in the same direction on panels / furniture.
- Failure to do this will result in adjoining panels / furniture showing a contrasting light and dark shading effect.

GREEN STAR

- ATELIER can be used on white furniture certified by AFRDI, GECA, Ecospecifier (Level B + C) and ECNZ.
- The Green Star Rating Tool states “Where at least 90% of an item’s mass is certified to a GBCA recognised standard, the item can be entered as a certified product at Level A, B or C”. Therefore, any fabric can be used as fabrics are almost always under 10% by weight of a furniture item.

WELL

ATELIER can contribute to the following WELL criteria:

- Toxic Material Reduction: ATELIER is free of PFCs, flame retardants, phthalates + urea formaldehyde
