Ecoustic® Yalgu Trimming Guidelines

- The Yalgu print does not extend to panel edges
- An unprinted border occurs on all four sides
- The panels need to be trimmed before installation with or without the use of edging profiles

Please adhere to the following guidelines for trimming:
- Refer to design name at bottom of panel for correct design orientation and keep orientation consistent
- Align a straight edge along the horizontal and vertical print edge and trim
- Refer approximate dimensions below for full print size
- Trimming into print area will affect pattern continuity from panel to panel
- Do not measure from panel edge as the print may not be centred within the panel
- Make all measurements and cuts based on print area

Please Note:
- Yalgu is designed to be continuous when trimmed to print edge, panelling will occur at panel to panel joins
- Always check panels side by side for correct orientation and pattern alignment prior to cutting and installing
- Yalgu is digitally printed, batch to batch colour variation can occur

Panel

BOTTOM CORNER

Panel Thickness:	8mm, 13.5mm + 25mm
Panel Size:	1210 x 2720mm / 3'11" x 8'11" approx.
Print Size:	1200 x 2700mm / 3'11" x 8'10" approx.
